

*"We bring tech into wine"*

## **ABOUT US**

GrapeAlliance founded in 2019 has created a digital platform called GrapeManager to collect data, organize it and digitalize the **wine** industry. In the form of **Big-Data** and **AI** applications, we focus on **B2B** services for the **wine** world. Within our SaaS-platform our customers - including **winegrowers**, **wine** marketing agencies, **wine** brands and retailers - have the opportunity to analyse the flood of data and to get easy access to all their product prices and product availability on the internet. Therewith it serves as a valuable control tool over real-time distribution, data-based pricing and sales strategies.

Your heart beats for Tech? You want to help us to make the **wine** market more transparent? You're not just looking for your next job but want to be part of an ambitious team that works enthusiastic on the project "We bring tech into **wine**"?

## **WE ARE LOOKING FOR YOU AS A FRONTEND ENGINEER (M/W/D)**

- You develop scalable, stable and fast frontends with modern frameworks.
- From planning and design to realisation, you are responsible for ensuring that our product makes life easier for the **wine** industry.
- You design a unique experience to our customers by enhancing our applications and websites according to state-of-the-art trends.
- When it comes to frontend and design processes you are the number one driver for continuous quality improvement.
- You always try to transfer our company vision into the design of our tools
- In a fast-paced environment you are prepared to challenge others and be challenged yourself.

## **WE'LL POP THE CORKS IF YOU BRING THIS**

- You have experience in working with scalable (frontend) systems.
- You are familiar with at least one of the most common JS frameworks.
- You enjoy working in an agile environment.
- You are ready to learn new technologies, expanding your horizons and leaving your comfort zone.
- You care about sound engineering practices: develop, test, operate and document.
- Having backend knowledge (PHP, Node.js, Go) is a plus to help integrate our frontends.

## **WHAT'S IN IT FOR YOU:**

- A modern co-working office in the heart of Düsseldorf with tons of free coffee.
- You take an active role in shaping our fast-growing tech company.
- Your choice of hardware to have the most productive working experience.
- We expect full commitment, in return you get flexible working hours, the possibility of home office and +30 days holiday.
- We care about our team and write TRUST in capital letters.
- Flat hierarchies with a „Let's do it!“ mentality.

# Frontend Engineer

(m/w/d)

Location: Düsseldorf
